Cyber Threat Intelligence Dashboard – A Real-Time Dashboard for Tracking Cyber Threats Globally

The **Cyber Threat Intelligence Dashboard** is a **real-time monitoring system** that **collects, analyzes, and visualizes global cyber threats**.

The dashboard integrates **threat intelligence feeds (VirusTotal, Shodan, IBM X-Force)** and provides **AI-based risk analysis**. Built with **Flask/Django for the backend and React.js/Vue.js for the frontend**, it offers **real-time alerts, visual analytics, and automated reporting**.

By **enhancing situational awareness**, this project helps **organizations stay ahead of emerging cyber threats**.
