Freelance Marketplace Website – A Platform Like Fiverr or Upwork for Freelancers

The **Freelance Marketplace Website** is an **online platform that connects freelancers with clients** looking for various services such as web development, graphic design, content writing, and digital marketing. This project provides an end-to-end **job posting, bidding, hiring, and payment system** similar to Fiverr and Upwork.

Key features include:

- **User Registration & Profile Creation** – Separate portals for clients and freelancers.
- **Job Posting & Bidding System** – Clients can post job requirements, and freelancers can submit proposals.
- **Escrow Payment System** – Secure payment handling, where funds are released only after project completion.
- **AI-Based Matching** – Machine learning algorithms recommend freelancers based on client needs.
- **Messaging & File Sharing** – Secure communication between clients and freelancers.
- **Review & Rating System** – Feedback mechanism to ensure trust and transparency.

The platform is developed using **Flask/Django for the backend, React.js for the frontend, and PostgreSQL/MySQL for database management**. AI-powered job matching enhances the **efficiency and effectiveness of freelancer-client collaboration**, making the platform a **highly functional and user-friendly freelance marketplace**.
